The Price Index achieved a month high of 6,224.3 points on the 7th of July.

## Fund review:

The Month of July was dominated by the American Debt Crisis as most markets worldwide went on a bearish spree. This was compounded with the euro zone issues as well as the continued violence in Syria and the return of protests in the largest Arab market Egypt. The Kuwaiti stock market took another big hit this month with the KSE index at one point of the month diving below the psychological support level of 6,000. The general investor sentiment in Kuwait still seems very negative and is witnessed by the poor volumes and pressure on the markets on very poor volumes.

The Al Ahli Kuwaiti fund performance was -2.03% MTD and -9.10% YTD as compared to the KSE weighted index which was -2.86% MTD and -12.92% YTD, and its benchmark the KIC index that recorded -3.22% MTD and -16.49% YTD.

The fund managers constantly take into account the volatility of the stock market as a whole in deciding the asset mix and cash percentages in this volatile period, this approach in turn has and will continue to reflect on the Fund's overall future performance. We believe that an extremely careful stock selection criteria needs to be continuously adopted in the coming periods with risk aversion at its peak. The fund holdings are monitored regularly, various risk factors are taken into account by our investment team and appropriate action to rebalance both stock and cash allocations is taken when needed.
